Principles of evaluating Dora Plus sub-activity 1.1 grant applications in the School of Economics and Business Administration

In addition to the procedure established in the Directive of the Vice Rector for Academic Affairs no. 2-1.17/P2/1000 of 3 May 2016 “Rules of applying for support for Dora Plus sub-activity 1.1, participation of young researchers and master’s degree students in the international exchange of knowledge, in 2016”, the evaluation of Dora Plus sub-activity 1.1 grant applications in the School of Economics and Business Administration takes into consideration the following criteria.

1. Preferred target groups in application evaluation:
   1) doctoral students;
   2) lecturers or researchers being not older than 35 years or not having passed more than 5 years from the date of defending his or her doctoral thesis;
   3) master’s students;
   4) students of integrated bachelor’s and master’s curricula who have completed subjects in the volume of at least 180 ECTS.

2. Preferred objectives of study mobility:
   1) making an oral presentation at a conference;
   2) making a poster presentation at a conference;
   3) participation in a conference;
   4) participation in a seminar, course or workshop if the topic can be related to the grantee’s curriculum;
   5) other study and research related activities (e.g. working in a library, using a laboratory, developing study materials, working with a supervisor, field-work, consultations). The topic of the event must be closely related to the grantee’s research.

3. All applications are required to include a written evaluation by the supervisor or immediate supervisor about the necessity of the study mobility. The evaluation of the supervisor or immediate supervisor shall outline why the specific study mobility is necessary (prestige of the conference, need to discuss the scientific article at the conference, meeting competent people who are needed for developing the research, participation at the conference together with the supervisor, event is related to the topic of the grantee’s research etc.).
